SECOND EARTH

Second Earth [Gaia Project]

PLVS ULTRA

VR Technology

STARLINK

The SET Perpetual Motion Model (PMM)

Second Earth Unique Features

1. Dual coin model (SET & GA)

2. POM consensus
- Mission mining & action mining

- First mover, innovator advantage

3. Deposit & Staking Box

4. Data & behavior analysis
-Bill Bent's big data statistical model and John Larry Kelly's Kelly formula

- Considering data such as the number of citizens, token circulation, token price, etc.

5. Four major stages

Total Supply 5.101亿
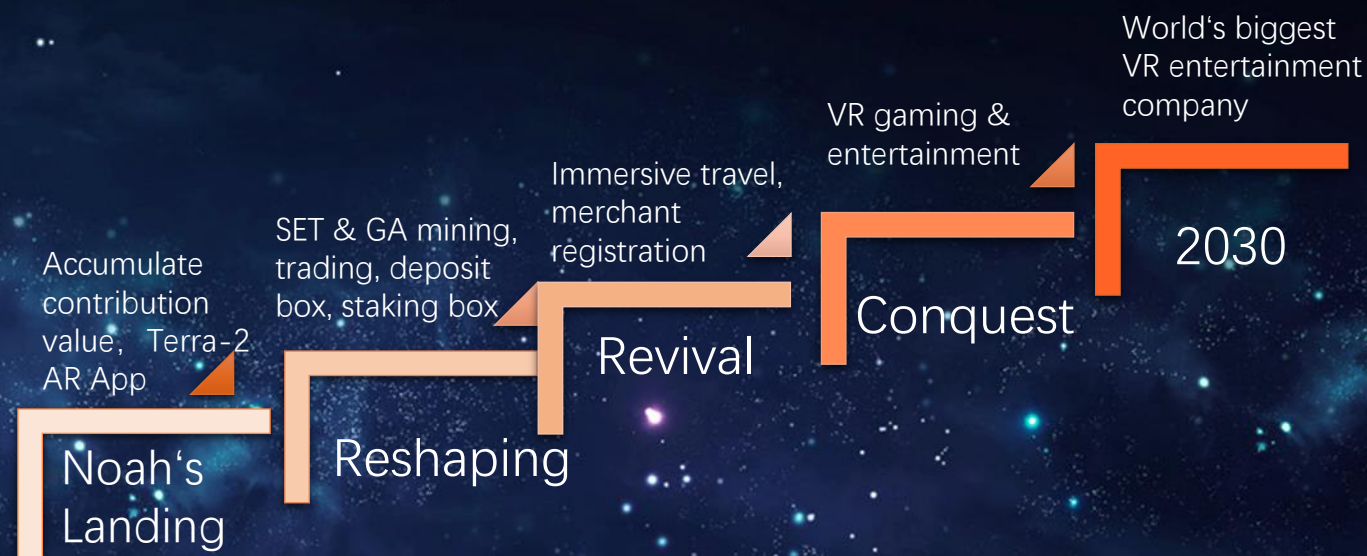

Initial Supply 510万

Contri-bution-based distribution

Photo Mining

GAS for SET Chain

SET:GA = 1:1

Action Mining

Free to Mine for Everyone

Accumulate contribution value， Terra-2 AR App

Noah's Landing

SET & GA mining, trading, deposit box, staking box

Reshaping

Immersive travel, merchant registration

Revival

VR gaming & entertainment

Conquest

World's biggest VR entertainment company

2030

Second Earth Model –*Deposit Box, Staking Box, Referral Network*

Deposit Box

- 3 levels

- Deposit amount adjustable

- Users must deposit to take missions

- Proportionalized deposit box referral income

- Only highest deposit box level can create OTC orders

Satellite Deposit Box — 450

Space-capsule Deposit Box — 1400

Spaceship Deposit Box — 11000

A → A: 11000
B → B: 1400
C → C: 11000

- A can receive B&C's complete GDP (hash power)
- B can only receive 1400 GDP from C

Active & passive income

Daily passive income

$$\frac{Personal\ GDP}{Network\ GDP} \times Daily\ output$$

$+$

Daily active income

$$\frac{Smaller\ lines\ GDP \times 0.618^2 + largest\ line\ GDP \times 0.618^8}{Network\ GDP}$$
x Daily output

$=$

Total SET Income

Second Earth Economic Model: Referral Network

Referral Network

- Unlimited lines & levels
- Largest vs. Smaller referral lines

The 4th line is the largest referral line， the 1st, 2nd and 3rd line are the smaller referral lines
The 4th line's GDP is calculated as follows: $10000 \times 0.618^8 = 212$
The 1-3rd lines' GDP is calculated as follows: $9000 \times 0.618^2 = 3437$
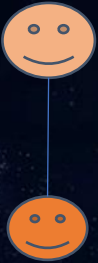

Second Earth Economic Model

Staking Box

- 10 unique role levels

- Re-invest to upgrade roles, re-invested tokens go into the Staking Box

- All Staking Boxes are pooled together and in time will become everyone's largest referral line (no additional GDP)
- Requirement: users can only enjoy the staking box benefit if none of their referral lines exceeds 40% of user's total GDP (balancing rule)
- Withdrawals: tokens from the Staking Box can be withdrawn any time and will be redistributed to the user over a period of 3-24 months depending on the continued growth of deposits by his referral network
- Re-upgrade: if users want to upgrade again after withdrawing tokens from the Staking Box, they can do so at original prices
- Example: A has deposited 1400 SET, to upgrade to Intermediate Pioneer, A re-invests 2800 SET at the price of 1 USD。After withdrawing all his tokens from the Staking Box, the SET price has already reached 10USDT, however, A only needs to re-invest 2800 USD wirth of SET, NOT 28000 USD, to re-upgrade and reach the same level again

Unlimited referral lines, continuously keep referring, this is the way to maximize your income!
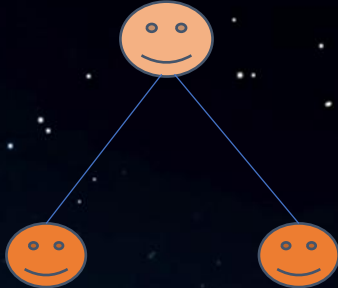

1. Direct purchase of SET
2. Continuous re-investment of daily income

640x GDP — Imperial Senate Member
360x GDP — King
250x GDP — Governor
150x GDP — Mayor
90x GDP — Deputy Mayor
50x GDP — Official Explorer
30x GDP — Potential Explorer
20x GDP — Advanced Pioneer
10x GDP — Inter-mediate Pioneer
5x GDP — Junior Pioneer

Withdrawing from Staking Box = downgrade to lowest level

Referral network GDP 10000

GDP 6000 (60%)
GDP 2000 (20%)
GDP 1000 (10%)
GDP 1000 (10%)

Referral network GDP 10000

GDP 2000 (20%)
GDP 2000 (20%)
GDP 2000 (20%)
GDP 2000 (20%)
GDP 1000 (10%)
GDP 1000 (10%)

How to Maximize Income

**Case 1: Only one referral line**

Referral line GDP share 100%, cannot enjoy Staking Box benefit, income very small
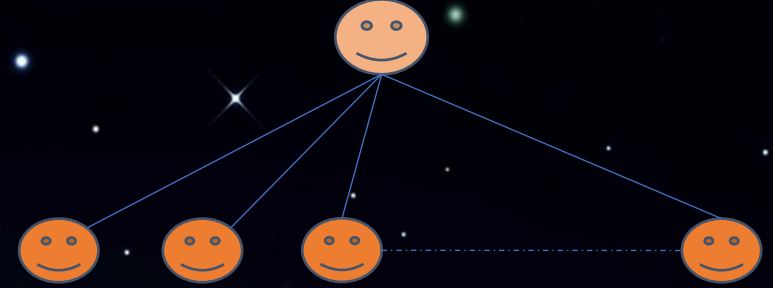

Case 2: Two referral lines

In this case one of the lines must surely exceed 40%, so user cannot enjoy Staking Box benefits and income will be rather small

Case 3: Three referral lines

In this case it is possible to keep all lines below 40%, if the user enjoys the Staking Box benefits, **ALL of those 3 lines will become smaller referral lines and income will be considerably larger!**

Case 4: More than 3 referral lines, 5x income cap (Junior Pioneer, deposit box 450 SET) reached

If the user established more than 3 referral lines and his referral GDP income reaches 2250, then additional GDP will not count until the role is upgraded

2 Options

Upgrade deposit box to 1400 SET, then the 5x income cap will increase to 7000

Re-invest SET and upgrade to Inter-mediate Pioneer (income cap 10x = 4500)

No matter which option you choose, continue to refer directly and increase your income cap!

Maximize income: Refer directly! Increase your income cap!

Referral Income Examples

Junior Pioneer: referral income cap 5x

Deposit Box ▐▉▉▉▉▉▉▉▉▉▉▉▉▉▉▊ 450

SET Project Highlights

Dual coin model to control market, stable upward price pressure

Online & offline experiences

Deposit for mission mining

Staking Box withdrawal model prevents large-scale dumping

Shared Staking Box as largest referral line, strong helps weak

Re-upgrades and re-investment ensure continuous coin ciculation

POM algorithm

Strong business model, compelling use case, simple play style
